Evacuation
Drain valve.

**Numerous combinations
of accessories and baskets**
Suitable for each type of use.

Also exists as built-in version

Pivoting heating element
The pivoting heating element
system ensures easy access
to the container and makes
daily upkeep simple.

PASTA COOKERS WITH LIFT

2 independent lift
With timer.

Precise cooking time

Drain valve

Baskets
Possibility to integrate 3 small
baskets on each side (optional).

Water
Possibility to integrate water
supply (optional).

The excellent quality of the pasta
cookers guarantees the user
top-quality performance, constant
safety and simple maintenance.

So it is not surprising that designers
often turn to Valentine when
creating a work surface which best
suits their expectations.
